Verbal Description:

Raised Band, Flat Field headdress

This solid example appears to have opened into a hollow figure body so that the head was oriented at approx. a 30° angle. The entire head fragment is concave and the back is smooth. The headdress includes a raised band which traces its margin and a flat, undecorated field which is circumscribed by said band. Band and field are separated by a groove. The ends of the headdress are flush with the base of the earflaps. The facial features include almond-shaped eyes with raised margin punctated pupils & raised lids, the scar of a large, triangular nose and a raised-lipped mouth (slightly indented upper lip) and a wedge-shaped, T-shaped teeth. Chin is separated from chest by a groove. Centered by cone
